EVERFLOW TECHNOLOGIES
UX Designer

- Lead design system improvements, reducing UI inconsistencies and accelerating feature delivery
- Redesigned core workflows for attribution and analytics, reducing task completion time by ~25%
- Partnered with engineering and product teams to align UX decisions with technical constraints and business goals

FRONTEND DEVELOPER

Desjardins Insurance

- Built and maintained scalable frontend components used across multiple insurance products
- Improved cross-device usability through responsive design, increasing overall user satisfaction scores by ~30%
- Accelerated feature release cycles by ~20% through reusable component architecture

UX DESIGNER

Evident Scientific (Olympus)

- Led UX redesign for scientific and enterprise-grade software
- Conducted 50+ usability testing sessions with researchers and domain experts
- Created and maintained a design system to align cross-team development and visual consistency
